WILLIAM S. FRANKL, M. D.

THOMAS J. VISCHER PROFESSOR OF MEDICINE

Dr. Frankl received his undergraduate degree in Biology from Temple University in 1951 and his M. D. from Temple University School of Medicine in 1955. In 1961, he was awarded a Masters of Science in Medicine from Temple University. After Internship at Buffalo General Hospital and Residency at Temple University School of Medicine, he served as an American Heart Association Fellow at the University of Pennsylvania School of Medicine, Section of Cardiology.

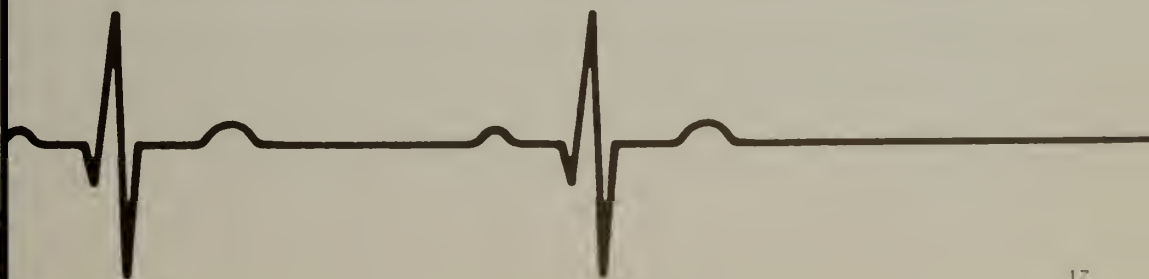

Dr. Frankl returned to Temple in 1962 to direct the Electrocardiography Division and Coronary Care Units until 1968. From 1968 to 1979, he served as Chief of Cardiology at the Medical College of Pennsylvania. In 1980, Dr. Frankl moved to Thomas Jefferson University where he served as Director of both the Cardiology Fellowship Program and the Cardiovascular Research Program.

He came to Hahnemann in 1984 to practice cardiology as Professor of Medicine and Director of the Likoff Cardiovascular Institute. In 1986, Dr. Frankl was appointed Chief of Cardiology, the Thomas J. Vischer Professor and Chairman of the Department of Medicine.

Under Dr. Frankl's leadership the full time faculty of the Department of Medicine increased considerably in size. Each of us has gained from this expansion and diversity. Many of us have been fortunate to rotate through Cardiology A and have had the opportunity to work with and learn from him directly. He has taught us the art of the cardiac examination and the skills of physical diagnosis.

Dr. Frankl, we acknowledge the effort you have put forth to help us become better clinicians and thank you for your involvement in our medical school careers. We gratefully dedicate MEDIC 1992 in your name.

Dear Members of the Class of 1992,

Please accept my heartfelt congratulations to you on your successful completion of the medical program. I hope that the outstanding education you have received here will be the springboard for great accomplishments for every class member.

This class represents the first one to graduate from Hahnemann University since my inauguration as its president. I have taken pride in watching your progress in much the same way that I do in nurturing the development of this great institution.

Best wishes to each of you as you pursue your career goals for the future. Your accomplishments will reflect positively on the image and reputation of Hahnemann and will be a continuing source of satisfaction for this university.

Sincerely,

Iqbal F. Paroo

Dear Doctors,

Congratulations to you on successful completion of
an arduous course of study.

As you embark on the next stages of your medical
careers, I trust that your years at Hahnemann and the
education that you have received here will serve you
well.

Please accept my wishes for your continued success
and the hope that your achievements will be many.

Sincerely,

Harry Wollman, M.D.

PARENTS AND PARTNERS DAY

Just imagine the opportunity to share gross anatomy lab with people who may be unfamiliar with the aroma of formaldehyde; experiencing the excitement of the HUH MEDEVAC helicopter poised atop the hospital; sitting in Geary Auditorium for a very special lecture.

FITNESS CENTER

The first step on the road to HUH's student activities center was the opening of the Student Fitness Center in the Fall of 1991. Students can now take an athletic break from studying without leaving the campus - a pool table, video games, and a music room all provide additional alternatives for a break.

BED RACES

The Franklin Institute has traditionally overlooked the site for these wacky escapades as students vie to creatively decorate themselves and most importantly the hospital beds prior to racing them down the street. Sprints on crutches and conveying bed pans without spilling all went into a riotously fun time.

HAUNTED HOPSITAL

Halloween - holiday of ghosts, ghouls and goblins gave HUH students the opportunity to don grease paint and costumes calculated to amaze, surprise and perhaps frighten fellow students, faculty and appreciative children.

ULTIMATE LEMON HILL

Lemon Hill was the site of weekly ultimate frisbee encounters as well as numerous class gatherings to enjoy "the great outdoors". Good examples of hard work on and off the field. What better way to spend a Friday afternoon?

SPORTS

RUH's soccer team has been very active and well received, participating in both indoor and outdoor leagues. Volleyball has been an important and exciting part of intramurals at a variety of locations including Roman Catholic HS and the local YMCA. Basketball also has been a fixture at the "Y" attracting faculty as well as students from all disciplines.

FOLLIES

In the "heat of the night" could have described Follies II as the enthusiasm was high and the lights hot while the air conditioning failed. The GCs provided musical entertainment and the Vagal Tones sweetly crooned, while the Village People shook down the house. During first year Follies, professors were mimicked, HTV was produced, and a psychic added interesting revelations to the program. The spirit of the events was to have a good time - laughing, mostly at ourselves. Other acts of note: The top ten songs included Help Me Rhonda, Dear Beatrice, Bug Parade, the Kick Line, and the Gong Show.

BOAT RIDE

June '91 saw the completion of our Junior Year (class of '92) and in celebration of the event a crew set sail from Penn's Landing on board the mighty ship Liberty Bell. Dinner and dancing comprised much of the bill of fare with an exciting cruise down the Delaware River providing an ever changing backdrop. Clambering up and down the ladders became more challenging as the colorful sunset deepened into night and the beat of the music increased. The Electric Slide was performed on the dance floor as the party came to an end and the moon rose in the sky. -

... on our way up!

DO YOU REMEMBER . . .

"We are pleased to inform you that you have been accepted as a member of the class of 1992 at Hahnemann University School of Medicine "

8:00 a.m., August 28, 1988 — Dr. Judy Churchill started four years of medical education with "The Nucleus"

9:00 a.m., August 28, 1988 — Dr. Kathryn Fuscaldo started the frustration with "Principles of Genetics" — does anyone understand it now??

10:00 a.m., August 28, 1988 — Leslie "FREDDY" Krueger continued the "Principles of Genetics" — then thinking medical school might be a mistake.

1:00 p.m., August 28, 1988 — "Meeting" your cadaver, Jenny Janiuk passing out and "Mortui Vivos Docens"

Psychiatry lectures: you do??

"Beads on a String", "solenoid", "loop domains"

Dr. Rubertone's pterygopalatine fossa in a box

Paul Schnur sitting in the front row aiding in AV disasters

Orientation trips to the Philadelphia Zoo and a Phillies Game

"Room 17-1-1-1" — Dr. Banaag and Geri Dickerson

Halloween Party and the haunted hospital — October 28, 1988

Studying in the Library

Dr. Weiland's wacky ties and Dr. Landau's tie-dyed lab-coat

Living in Stiles with your pet roaches and rats

To Zanzibar By Motor Car

On Old Olympus Towering Tops A Finn And German Viewed Some Hops, or did you learn the alternative; Oh, Oh, Oh To Touch And Feel . . .

Is it a spleen or a lymph node? You couldn't tell from Amenta's book (or from Kath's notes)

The Gross Anatomy Videotape: "Retropharyngeal Emphysema with Impending Airway Obstruction"

Parties DJ'ed by the "two short guys"

Dr. Amenta's memo on sinus vs sinusoid

Rivers of Pus: The Movie of the Year

Freshmen Follies: the vagal tones, top ten list, the G.C.'s, the kick line, Brian's mom the psychic, Bart going psychotic . . .

Going to AA for Intro to Psych

Dr. DiGregorio's cannabis — Remember to get the female plant

Fridays: Happy hour in the Student Lounge

Cutbacks at HUH

The Construction — having to cross 15th St. — Vine Street — 15th Street just to get to Stiles

When the "Basic Steps": Inspection, Palpation, Percussion, Auscultation" were something to memorize

The auctions

The Great Cholesterol Debate: Drs. Spitzer and Bender

Prescription Writing Lab in Pharmacology

Pathology Food: nutmeg liver, cherry hemangiomas, honeycomb lung, cauliflower ear, cheesy granulomas . . .

#2 pencils with lots of erasers

The video at the end of Pharmacology

The Gentle Reader

How long will you feel the vibration from a 128 Hz tuning fork held on your big toe - only Dr. Soricelli knows for sure!

Sophomore Follies: the air conditioning wouldn't work, the vagal tones and G.C.'s were back, the Village People with Dr. Maenza, cooking with Dr. Maenza . . .

Boards Part I: starting to study in January?? ... cramming in May	The Chicken Lounge in Allentown, Club Paradise (Parasite) at Monmouth
Faculty to students (March 1990): "There's no reason to start studying for Boards before I.C.M. is over."	The Blue house (actually it's green) and the Brown house (which is beige) at Sayre
Going to Doc's	Which bounces higher: a bilirubin stone or a cholesterol stone?
Going to Friday's	
"Dear Beatrice"	Who has the worst handwriting: Dr. Oaks, Dr. Miller, Dr. Clearfiled, Dr. Sherman, Dr. Fischer ... or will it be you?
The mouse in Geary	
Jimmy Dog	Medicine at HUH ... then off to the affiliates and back to HUH for the last O.S.C.E.
Working out at the Y	14 weeks of surgery — first it was 12, then it was 14, then ...
Ultimate Frisbee at Lemon Hill	
Ordering I.C.M. supplies then asking your parents for a loan	That difficult case of a valgus knee ... or was it varus?
"I'm touching you now"	Your first night on call — hoping your beeper wouldn't go off and then checking to make sure it really was on
Meeting your preceptor for physical diagnosis rounds (maybe)	Ob/Gyn: delivering your first baby
Where's your PMI?	The Denver Developmental Scale, MMR's, OPV's, DPT's
Your first clinical rotation	The Cruise — was it the waves, the open bar or Dave and Joe leading the "Electric Slide" that made everyone queasy
Your first clinical rotation evaluation - 6 months or more later.	Fighting with Flossie about subinternship, ambulatory, electives, and basically everything
Never hearing your overhead pages	C.V.'s, Personal Statements and applications and applications ...
Faculty to students (August 1990): "Why didn't you start studying for the Boards earlier?"	Going on interviews and having people say to you "Isn't Hahnemann in Pittsburgh, or is it Washington?"
S.O.A.P. notes/Off-service notes	
Finally finding out exactly where the Bobst building is	Putting in your rank order list after obsessing over it for weeks
Green felt tip pen in the charts at HUH — Guess who?	
Monmouth — so what did you find washed-up on the beach?	March 18, 1992 — so just how many of us got our first choices?
The food at Lehigh Valley ... the food at Allentown	May 29, 1992 — It's time for a new white coat!

... of children

Your children are not your children.
They are the sons and daughters of Life's longing for
itself.
They come through you but not from you,
And though they are with you yet they belong not to you.

You may give them your love but not your thoughts,
For they have their own thoughts.
You may house their bodies but not their souls,
For their souls dwell in the house of tomorrow, which you
cannot visit, not even in your dreams.

"Heimlich anyone!?"

The Creed

Please hear me God, as I pray to you this day.
This is a special day for me, a day in my life.
As day leads into night, it will conclude,
Unalterable and final.
So I pray to you that what I do today is good and not evil,
Worthy and not vain, success and not failure.
Let me proceed in the tasks at hand with complete conviction
And persevere, so that honor and dignity will flourish.

You have given me the capability.
Now let me use the strength to fulfill my purpose.
Yesterday is past.
Tomorrow may not exist.
The future is a succession of todays.

Guide me in achieving what I set out to do this day.
Let me exceed even my own expectations,
So that my existence on this earth has merit;
So that my actions inspire the vitality of man;
So that this world may breed in the life of Your creation.

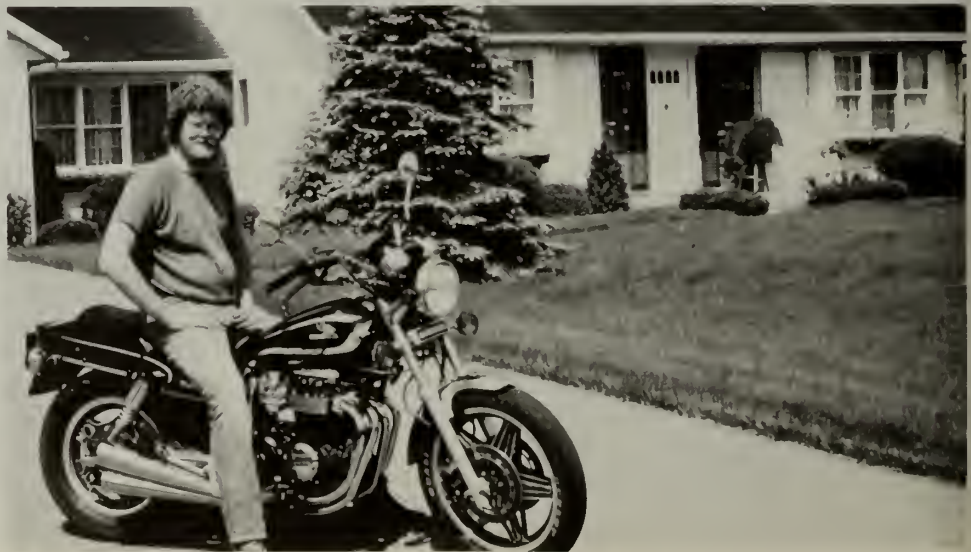

These things I ask, in exchange for this day of my life.

DAILY PRAYER OF A PHYSICIAN

Inspire me with love for my art and for Thy creatures. Do not allow thirst for profit, ambition for renown and admiration, to interfere with my profession, for these are the enemies of truth and of love for mankind and they can lead astray in the great task of attending to the welfare of Thy creatures. Preserve the strength of my body and of my soul that they ever be ready to cheerfully help and support rich and poor, good and bad, enemy as well as friend. In the sufferer let me see only the human being. Illumine my mind that it recognize what presents itself and that it may comprehend what is absent or hidden. Let it not fail to see what is visible, but do not permit it to arrogate to itself the power to see what cannot be seen, for delicate and indefinite are the bounds of the great art of caring for the lives and health of Thy creatures.

— Moses Maimonides

ROBERT H. HALL, M.D.

TEMPLE UNIVERSITY

UNIVERSITY OF PENNSYLVANIA

"When I tell people that I am a musician by training, they frequently remark that the two pursuits, medicine and art, seem somehow opposed in their means and goals. Having been through four years of medical school, I can see their point. However, on a deeper level, such a view is incorrect. At its best, medicine begins as science and proceeds toward art while music tends to follow the opposite course. At their highest level of expression, medicine and music have a great deal in common. For me, the study and practice of medicine provides a way of making the circle complete; that is, a means of combining and integrating the analytical and the intuitive or, if you like, the needs of the body and spirit."

KENNETH ALFRED KIST, M.D.

TEMPLE UNIVERSITY

"Let no man be discouraged by the belief that there is nothing that one man or woman can do against the enormous array of the world's ills, against misery and ignorance, injustice and violence. Few have the greatness to bend history itself, but each of us can work to change a small portion of the events, and in the total of those acts will be written the history of this generation. It is from numberless diverse acts of courage and belief that human history is shaped. Each time a man stands up for an ideal, or acts to improve the lot of others, or strikes out against injustice, he sends forth a tiny ripple of hope. And crossing each other from a million different centers of energy and daring, those ripples build a current which can sweep down the mightiest walls of oppression and injustice."

PRINT NAME _____ M.D.

... Thank You!!

We're moving right along! From the horse-drawn ambulance of the 1890s to the 1912 Packard to the University MedEvac helicopter ... we have been bringing our patients in style ... to the best possible care available. In the 1890s it was antiseptic surgery, tender care and concern ... today it is MRI and transplants and monoclonal antibodies ... in 2000 what will it be?

You will provide the answers. You have been educated to move medicine into the 21st century, to develop the techniques and the materials for even better health and to provide them always with the same care and concern.

Take with you our admiration
And our best wishes as you advance in your profession.

THE BOARD OF TRUSTEES
PRESIDENT & ADMINISTRATION
OF HAHNEMANN UNIVERSITY

Amy Asato '95
Mike Casdorph '95
Nancy Gideon '95

EDITORS-IN-CHIEF: Jamie Morris, Denis Keohane, Joanne Filicko

Thanks to Scott Friedman-Advisor, Jean Dorman, Phyllis Fisher and the Development Office.

Special Thanks to Bud Hefflin-*Medic 1992* Advisor for his constant support and encouragement and to Bill O'Brien of Jostens for his patience, humor and his 24 hour phone line.

The staff of *Medic 1992* would also like to thank the Medical Student Institute and our advertisers for their financial support.

A final thanks to the parents and friends of the yearbook staff for putting up with us during the past year as we rushed to make deadlines and the stress level rose — in particular to the Filicko, Keohane and Morris families. We couldn't have brought *Medic 1992* to its completion without you.

A FINAL WORD . . .

Remember the hippocratic oath you take as a physician to "heal not poison your patient." Some of the rules of Pharmacology that are important are:

Use just a few drugs in your patients and study them to a much greater extent than your pharmacology professors - know everything about the drugs you use.

Never introduce a new drug into your armamentarium without careful study and appropriate observation. Always limit refills in prescriptions and always bring your patient in for examination and questioning about the drugs they are using.

Keep very good drug files on your patients.

Finally, make sure your pharmacology notes are kept only as a memento - not for use - since pharmacology changes so quickly and good doctors know this.

I know you will all be good physicians. Good luck and success in your future endeavors.

Dr. Warren S. Chernick
Professor and Chairman
Department of Pharmacology

ADVICE TO THE GRADUATING SENIORS:

As you begin your career in medicine, please remember to keep studying the current literature, and in particular periodically review your basic sciences.

Peter S. Amenta, Ph.D.
Professor and Chairman
Department of Anatomy

Our Prescription for the Future:

As we've worked on the yearbook and reviewed the past 4 years at Hahnemann, we hope we've captured the spirit of the Class of 1992—the friendships, the hard work and the ability to roll with the punches — good ingredients for the making of fine physicians.

We prescribe for each member of the class a lifetime of happiness, success and fulfillment in your medical careers and throughout your lives.

*Joanne Filicko
Denis Keohane
Jamie Lynn Morris*

*Congratulations
to the
Class of 1992!*
